This text box will auto fit to the page. To change the font style, click inside this box and change the font style in the “Font” tab. Note that the “Not Autofit” radio button must be selected.

To change the font style, click inside the entire text box, then go to the “Font” tab. The font is set to Calibri 32pt and is easily readable.

Zoom out to 100% to see how the text looks on the page.

Genographics® has produced thousands of scientific research posters for clients around the world. The posters can be scaled up or down to fit any size space. For example, if you ordered a poster that is 48" wide by 36" high, it would be 83.3% of its original size.
